## Announcing VERDOT's Carbon Compensation Initiative for 2025

Riom, France | 03 January 2025

---

**Dear Valued Customer,**

We are pleased to share an exciting update regarding VERDOT's ongoing commitment to sustainability. Beginning in 2025, VERDOT will ensure all chromatography columns and stainless-steel skids are delivered as **carbon neutral** products.

For over a decade, VERDOT has conducted rigorous carbon footprint analysis across its operations, achieving one of the lowest levels in the bioprocessing industry, averaging **100 TeqCO<sub>2</sub> per million euros revenue**. Building on this success, we are now taking a bold step forward: the **total carbon footprint** of each manufactured product will be systematically calculated and offset through our partnership with **Stock CO<sub>2</sub>**, a B Corp-certified operator specializing in local carbon offsetting projects certified under the French Bas-Carbone Label.

**What this means for you:**

- **Carbon Neutral Products:** Every VERDOT chromatography column and stainless-steel skids will have its emissions neutralized, contributing to your organization's sustainability goals.
- **Environmental Leadership:** By choosing VERDOT, you align with an industry leader committed to **eco-design, energy efficiency, and responsible manufacturing** practices.
- **Transparency & Certification:** The carbon offsetting process will be certified to ensure full transparency and compliance with leading sustainability standards.

We remain dedicated to driving innovation while helping our customers adopt sustainable solutions. If you have any questions or would like to explore how VERDOT's Carbon Compensation Initiative can support your environmental goals, please do not hesitate to contact your Business Development Manager or our Customer Service team at: [support@verdot-biotechnologies.com](mailto:support@verdot-biotechnologies.com)

Thank you for your trust and partnership as we work together towards a **more sustainable future**.

**Sincerely,**

Charles RUBAN

Chief Executive Officer
